

THERALINE

love care comfort

UNIQUE PRODUCTS

for a very special time

Love. Care. Comfort.

FINEST PEARLS - THE BEST CHOICE!

Experienced midwives confirm, there is nothing better to fill pillows for pregnancy and breastfeeding than our tiny, whisper-quiet pearls.

Their special lightness and unmatched adaptability make them the best-selling and optimal filling material. The free-flowing beads provide support and relief exactly where you or your baby need it.

But they are not only durable and hypoallergenic, they also ensure optimal heat and moisture transport.

Of course, they are also odor and pollutant free! And because they can do all that, they are our pearly "little heroes".

THE THERALINE HAPPINESS GUARANTEE

The innovative production and manufacture of our pillows, together with the use of superb materials is what makes Theraline's collection so extraordinary. We are proud to be specialists in the production of some of the best pregnancy and babyfeeding products available today.

Please visit our website to find out more about our range and why we are market leaders when it comes to mother and baby comfort products. Our range offers you complete peace of mind, with products that have been manufactured using only the best fillings and fabrics available. Products that are safe, non-toxic and offer you and your baby complete comfort. We are driven by the certainty that our products bring comfort, joy and happiness to parents and babies everywhere. We all know how breastfeeding can play a vital role in mother and child bonding during the first hours of life. Evidence suggests that breast milk boosts intelligence and helps babies become more independent later on. Breast milk is specially tailored for your baby. It is always on tap and always at the right temperature!

At Theraline we help you prepare for your exciting adventure with our pregnancy and baby products. We know that when you are pregnant you crave comfort and that the small things in life become really important. For 30 years, we have done our very best to continually improve our product range and to provide you with the best possible service. We guarantee that you will always find our products to be of exceptional quality and excellent value for money. Your comfort is paramount to us, which is why we are totally committed to ensuring that you are completely satisfied with your Theraline product. Our quality comfort products are perfect for pregnancy and beyond. Pillows come in all shapes and sizes with different functions and fillings and a price range to suit everyone!

Your Theraline Team

HEALTHY & SAFE PRODUCTS

You can rely on it: The absence of harmful substances in all filling and covering materials and one hundred percent product safety are always our top priorities. The Theraline pregnancy and breastfeeding pillows with pearl filling have therefore been certified with the Toxproof® label of TÜV-Rheinland since 1998. Since the end of July 2021, the TÜV Rheinland test seal has now been replaced by the OEKO-TEX STANDARD 100 seal of the Hohenstein Institute. The well-known seal gives you the assurance that you are purchasing a product from our baby or bed range that is guaranteed to be safe for your health.

We are glad that our original Theraline nursing pillow in fuchsia-cappuccino was also in 2016 and 2018 (in the category "side effects") top rated by the magazine Ökotest with "very good".

THE PLEASURE OF BEAUTY

No matter whether particularly color-fast fine twill, cuddly jersey, muslin, fine knitted fabric or sustainable bamboo viscose: All Theraline fabrics are high-quality and have a really good touch. Because they are made from exceptionally soft cotton or bamboo fiber. Mercerization and particularly color-fast prints lend a fine shine. Thanks to 30 years of experience, the workmanship is also right down to the smallest detail.

THERALINE

The Original THERALINE

A SPECIAL PILLOW FOR A VERY SPECIAL TIME

- Germany's most popular nursing pillow
- Flexible support for better sleep during pregnancy
- Recommended by midwives
- Versatile for all breastfeeding positions
- Relief for legs, belly and a stressed back

The Original Theraline Pregnancy and Babyfeeding Pillow has a filling made up of millions of tiny micro beads that are as light as a feather. The amazing filling conforms to the shape of your body during pregnancy, whatever position you are in ... whether lying down or sitting up.

It will remain supportive without giving way. It is also anti-allergenic, warm, breathable, will double up as a baby feeding pillow and can be washed at 60 °C.

THERALINE
für geliebte Zeiten

THE ORIGINAL THERALINE PREGNANCY & BABYFEEDING PILLOW A SPECIAL PILLOW FOR A VERY SPECIAL TIME

HIGHEST QUALITY & LONGEVITY

- Especially high quality fabrics
- Wide range of colors and designs
- Fluffy-smooth & extra hard-wearing
- Easy to cover with long, concealed zipper
- Low noise original micro bead filling
- Easy to refill thanks to the tunnel opening
- Odourless and free from harmful substances

OUR PEARLY LITTLE THERALINE HEROES

The unique filling of the original Theraline pregnancy and breastfeeding pillow provides relaxation while breastfeeding your little darling. Already during pregnancy, it provides stable support for the baby's belly, arms and legs, so that you can sleep comfortably on your side. Ingenious combination: millions of sand-fine, whisper-quiet Original micro beads in combination with the perfect filling level of the pillow make it flexible and cuddly. At the same time, it offers pleasant support during sleeping & breastfeeding. You can easily refill or remove micro beads via a self-sealing tunnel opening - depending on how stable or soft you like your pillow.

Info & Service

*Ask your
Midwife*
In our survey over 90 % of the German midwives questioned recommend breastfeeding pillows from Theraline

You can find the complete survey on www.theraline.de/umfrage

TIP:

All our products (with the exception of the plush moon) are washable at 60 °C. Virtually, however, a 40 °C wash is quite sufficient. This saves energy and protects the environment. Therefore, we recommend washing our products only at 40 °C.

COLOURFUL VARIETY

Covers and designs: The covers for the Original Theraline are available in many high-quality fabrics: fine jersey, velvety-soft fine twill, particularly sustainable bamboo jersey, cuddly-soft fine knit and fluffy muslin. There is something for every taste.

The Crinkly Animals

Fantastic applications with a sizzling noise feature for your baby's little expeditions. So sweet.

Our fluffy light muslin

The light and airy muslin fabric is made of 100 % cotton. To love, immediately feel good and snuggle in. The high-quality 4-layer design, its fine structure and a wonderfully soft feel make it the most valuable fabric in the Theraline collection. You should definitely try it out!

UNIQUELY SMOOTH & CUDDLY

The Theraline Plushy Moon is unbelievably soft and cuddly and is perfect to use when relaxing. It is an easy to carry pregnancy and baby feeding pillow, making it ideal if you already have a larger pregnancy and baby feeding pillow at home, but like to use one when you're out and about.

And if you're tall, its special shape enables you to elevate your baby's head higher than you would normally be able to when using some of the other smaller nursing pillows available. What more could you ask for!

Many attractive colors at www.theraline.com

WIDE VARIETY OF PREGNANCY & BABYFEEDING PILLOW

The Bamboo Moon

CUDDLE & NURSING PILLOW

WITH REMOVABLE COVER
MADE OF BAMBOO VISCOSE WITH ORGANIC COTTON

For lovers of fine, natural fabrics - or for all those who would like to cover the plush moon differently or wash the pillow or cover more often - the plush moon is now also available in our Bamboo Collection: with a removable cover and a cotton inlet.

The high amount of bamboo fibres (57 %) and organic cotton (38 %) makes this fabric one of the highest quality in the Theraline collections. Rounded off with 5 % elastane, the result is a wonderfully fine and cool fabric experience.

Bamboo
Collection

PRODUCT INFORMATION

Material

Cover: 57 % viscose from bamboo fibres, 38 % cotton (organic), 5 % elastane

Inlet: 100 % cotton

Never use inlet without cover!

THERALINE

The Baby Pillow

THE THERALINE BABY & KID'S PILLOWS

PREVENTION & REGENERATION - WITH SAFETY

KEEPING BABY SAFE AND SOUND!

Flat head syndrome is a condition where part of a baby's head becomes flattened due to continued pressure on one spot. Theraline has carefully and cleverly manufactured a comfortable baby pillow that now comes in two sizes. It is designed perfectly to fit baby's delicate head, helping to avoid flat head syndrome. Unlike other baby pillows it is anatomically shaped and perforated using high-tech fabric to support baby's head evenly and effectively

Size 1 (up to 7 kg)

PREVENTION & SAFETY*

- Helps to prevent from deformities of the head
- Supports a faster back-formation of misshaped heads
- High safety thanks to a completely breathable 3D Spacer Fabric without cover
- Ergonomic and comfortable sleeping position
- Smooth and skin-friendly surface
- Temperature-equalizing and hygienic

ERGONOMIC AND COMFORTABLE

The Baby Pillows' ergonomically designed high-tech spacer fabric offers perfect support for babies. It is completely safe to use, very supportive and offers excellent comfort.

FREE BREATHING THANKS TO THE FULLY BREATHABLE 3D SPACER FABRIC

* Always consult your GP if you think your baby is developing flat head syndrome.

TOTALLY SAFE TO USE

The Baby Pillow (Size 1 and 2) allows air to pass easily through it. Even if baby rolls over or presses her/his face into the pillow, they can still breathe freely. It also ensures that an even temperature is maintained at all times around the head. And because foam based products should not be used alongside babies, Theraline's Baby Pillow is the first of its kind not to use memory foam.

Size 2 (from 7 kg onwards)

REGENERATION & SAFETY*

- Supports fast correction of head shape
- Prevents deformation increase
- High safety thanks to a completely breathable 3D Spacer Fabric without cover
- Slightly stabilizing and ergonomic design for a comfortable sleeping position that encourages healing
- Temperature equalizing and hygienic

PRODUCT INFORMATION

BEAUTIFUL DREAM & HAPPY AWAKENING

Sufficient and healthy sleep is especially important for our little ones so that they can face the challenges of life rested and happy. Therefore, it is especially important for our children to sleep on an ergonomically suitable pillow.

At Theraline, with 30 years of experience in the nursing pillow and baby pillow sector, we have therefore made it our task to develop a children's pillow that gives our little ones comfortable support so that they sleep well and healthy and wake up happy and refreshed.

PERFECT SYMBIOSIS

- In our Kid's Pillow, hundreds of thousands of fine microbeads provide stable support
- The top layer of high-quality, point-elastic viscose foam gently and comfortably accommodates the child's head
- The inner cover made of a stretchy cotton/elastane mixture leaves enough room for the micro-beads underneath to flexibly move into the optimal position.

TherAlINE

MORE PRODUCTS FOR YOU AND YOUR BABY

Neck Pillow

THE COMFY TRAVEL & SLEEP PILLOW

- The perfect pillow for travelling
- Keeps baby stable in a lateral position
- Filled with fine, sand-like micro-beads for added support and comfort
- Odourless and free from harmful substance

Theraline's neck pillows are perfect for sleeping and travelling. Filled with tiny microbeads they can be used as in-car head support or as a pillow when away from home. They come in several designs including a range of animal neck pillows.

Cherry Stone Pillows

ALWAYS PERFECTLY TEMPERED

- Soft warmth as well as cooling
- Suitable for microwaves
- Perfect temperature storage
- For you and your child

OUR LITTLE CHERRY STONE HELPERS

For over a hundred years the Cherry Stone Pillow has been a popular household remedy for soothing sore backs or swollen legs. It can be microwaved for a short time and when heated offers a dry, soothing warmth.

Perfect to use during pregnancy or for relieving muscular pain. It can also be used cooled for soothing babies discomfort during teething.

Cherry Stone Animals

Use to soothe general aches and pains for all the family. Chill in the freezer or warm in the microwave. The cherry stone filling offers soothing relief for aches and pains, back and tummy aches and even period pains.

All Theraline cherry stone pillows are class 1 medical devices with CE marking.

CROSS SECTION OF A MAMMA PAD

Mamma Pad

Thickness:
approx. 2,7 mm

Adhesive coating:
Thickness: > 0,1 mm

USES A NATURAL BODILY REFLEX

Once you've used Mamma Pads you won't want to use anything else! Instead of collecting milk in nursing pads, this simple silicone pad temporarily shuts off your milk ducts by gently pressing in the nipple. Once removed the milk ducts open again and your milk can flow normally for the next feed. Mamma Pads will adapt to every breast shape. It applies gentle pressure which carefully inverts the nipple. You will be delighted with the results. If for any reason you are not 100 % happy with the product, we guarantee a complete refund.

— ♥ —
Economical:
for approx. 150 - 200
applications

EASY & PLEASANT TO USE

Thanks to a very thin, medical adhesive coating, the breathable silicone nursing pads stay in place easily. The adhesive coating of the soft high tech silicone pad adapts to every breast shape. It applies gentle pressure which carefully inverts the nipple. The use of breathable silicone means Mamma Pads are comfortable, unobtrusive and easy to wear. Silicone enables a gas and oxygen exchange, very similar to your own skin. (The same principle used with contact lenses). Mamma Pads are really light and easy to wear so you'll soon forget you've even got them on.

FOR ACTIVE & COST CONSCIOUS MUMS!

Mamma Pads are really easy to use. They are virtually invisible, and so light and unobtrusive you will soon forget you have them on. No other nursing pad is as discreet or thin. The use of breathable silicone means Mamma Pads are also hygienic, leaving you feeling completely dry and comfortable.

This makes them ideal for all round-use whether you're at home, work or swimming on holiday! Because Mamma Pads are reusable up to 150+* times they are eco-friendly and far more inexpensive than other breastfeeding inserts. Simply wash in soap and warm water, dry and you're ready to go!

* An approximate figure dependent upon the level of use and care taken when using each pad. For full product information visit www.thermaline.co.uk
